

It's all in the name

The Fresh Connection for Morocco

DailyFresh Logistics, the Moroccan shipping company I.M.T.C. and Coolboxx have joined forces to develop a new service to ship Moroccan perishables more efficiently to North European destinations. This new short sea connection is an excellent alternative to traditional road transport and offers competitive lead times. So your products will be in the shops just as quickly!

#### From Agadir to Dunkirk: "Innovation in Fresh Logistics"

The Moroccan products are shipped in 40-foot refrigerated containers and 45-foot Coolboxxes. Specially equipped container ships leave Agadir weekly on Wednesdays and arrive five days later on Monday in Dunkirk.

Upon request of the customer, the containers can be directly brought to their destination from the terminal in Dunkirk. The containers can also be transferred to the DailyFresh cross-docking centre in Dunkirk and delivered to several destinations in Europe via various groupage services. The most important locations in the United Kingdom, Germany, the Netherlands, Belgium and northern France (Rungis) can be reached within 24 hours.
